

MP3 3000 Series

A Breathable Worksuit Made in USA

MP³ is waterproof, windproof and breathable protection against electric arc, flash fire and heat stress hazards. MP³ is the lightest weight, most versatile protective Nomex[®] outerwear system available today. With innovation, versatility and value, you no longer have to choose between comfort and safety. MP³ is your protective outerwear solution.

Innovation

MP³ means Multi-Performance Trilaminate. It is a breathable Nomex[®] outerwear system designed to excel in all weather conditions. MP³ offers protection from exposure to electric arcs and flash fires as well as reducing worker heat stress.

Versatility

Its versatility makes it perfect for many applications. With an available Nomex[®] fleece lining, extended life cycle and retail appearance, MP³ is more than just raingear. MP³ has been proven successful in replacing other items provided to workers. Among them are windbreakers, FR hooded zipper sweatshirts, corporate image apparel, FR winter wear, FR fleece and traditional rainwear.

Value

MP³ offers a value proposition not available with traditional rainwear products. Its versatility and extended life cycle combined with a 3 year warranty create a value savings of 15% – 35% compared to common rainwear products used today.

Full length zipper for maximum warmth.

Angled pockets for easy access.

NASCO MP3 Warranty

For a period of 3 years from the date of manufacture, NASCO will repair, recondition and service any MP3 garment. This includes but is not limited to...repair of rips, tears, and holes; and reconditioning of garment features.
